

Pig Dissection sites

<http://www.whitman.edu/biology/vpd/main.html>

Highly recommended! This is a great, interactive website that should help you greatly. **This is the website we will use as our “dissection guide.”**

<http://biology.uco.edu/AnimalBiology/pigweb/Pig.html>

Also recommended. Less interactive, but the pictures and diagrams are excellent. Also has a dissection PPT you can download.

<http://www.execulink.com/~ekimmel/fetal0.htm>

This site may give you more realistic pictures (the pig quality you might most likely encounter in the actual lab or lab practical exam). Remember - all fetal pigs vary slightly in size and condition.

<http://www.execulink.com/~ekimmel/dissect.htm>

This is the more "updated" version of the site above. Very good also, includes a narrated video (very general) describing the major internal organs. Click on dissection lab link and scroll through next window to find interactive features. The flash version of the quiz is quite good!
